Resolution - Council

File Number: 15-155 **Agenda Section:** CONSENT CALENDAR

Agenda Number: 8.C.

TO: City Council

FROM: Chris Zapata
City Manager

BY: City Council

FINANCE REVIEW: Not Applicable

TITLE: RESOLUTION Opposing the Phillips 66 Oil Train Off-Loading Facility
Expansion in San Luis Obispo County

WHEREAS, the oil train off-loading facility expansion, being considered by San Luis Obispo County, would increase rail traffic through densely populated areas of Alameda County, increase risks of oil spills, fires and explosions that would damage residences, businesses, and at least twenty (20) schools located in the "blast zone" along the projected route; and

WHEREAS, the current rail system is designed to connect residents to their destinations throughout the Bay Area and NOT to move large quantities of hazardous materials like crude oil through populated areas; and

WHEREAS, the diesel emissions from trains along the route would generate toxic pollutants that exceed medically advised thresholds and cause cancer, heart disease and asthma, in an area that is the third highest for childhood asthma disorders in the State of California.

NOW, THEREFORE, BE IT RESOLVED that the City of San Leandro requests that the County Board of Supervisors of San Luis Obispo County deny permits for the Phillips 66 oil train offloading facility and the denial of any construction related to this project; and

BE IT FURTHER RESOLVED that the City Manager or his designee shall submit a letter to rail carriers involved in transport of crude oil, coal, and petroleum coke in California, requesting:

1. That the rail carriers make public any plans for new or expanded rail facilities or significant rail traffic volume increases;
2. That the rail carriers provide representatives to meet periodically with local citizens groups and local government officials from San Leandro to seek mutually acceptable ways to

address local concerns;

3. That the rail carriers update their emergency response plans with the City of San Leandro to account for the transport of crude oil, coal, and petroleum coke and the potential emergencies that could occur from accidents when transporting these hazardous materials;

4. That the rail carriers conduct environmental monitoring in San Leandro, including, but not limited to, groundwater and air monitoring, and submit environmental monitoring or testing information to local governmental entities on a monthly basis for 10 years; and

5. That the rail carriers implement measures to reduce community impacts including, but not limited to, drafting road improvement plans for grading, widening, or otherwise providing crossings at intersections that would be impacted by rail traffic increases to prevent rail accidents and offset congestion; and require the railroad to pay in full for these upgrades in San Leandro.
