EXHIBIT A

SCOPE OF SERVICES

This project will provide for traffic safety improvements at the intersection of Wicks Boulevard and Manor Boulevard. The project is funded with a federal aid grant. Hence, the project is required to comply with the requirements of the Highway Safety Improvement Program (HSIP) Federal grant.

The proposed improvements will include southbound and northbound flashing yellow arrow protected/permissive left-turn phases, upgrade signal heads and signal equipment, upgrade controller cabinet and power service cabinet, install video detections for cars and bikes, and advance detection system, install Accessible Pedestrian Signal (APS) system, install battery backup system, install a new crosswalk on the north leg, upgrade wheelchair Ramps, and improve signing and striping.

This contract is for design and permitting of the improvements, construction will be done by an outside contractor selected via public bid process.

Task 1.0 Project Management

Immediately following the receipt of the notice-to-proceed, Consultant will schedule a project kick-off meeting with the City to discuss project goals, objectives, tasks, roles, and responsibilities. Consultant will prepare meeting materials and a meeting agenda. Discussions will include coordination with Caltrans Local Assistance and assistance with obtaining the E-76 Authorization for construction.

Other elements of this task include general project management, including management of project staff, quality control, and project accounting. Monthly project invoices will be prepared and submitted.

Task 1.0 Deliverables:

- Kick-off meeting agenda, materials, and notes
- Monthly invoices and progress reports
- Detailed meeting minutes

Task 2.0 Preliminary Design

Consultant will perform background research, including review of readily available relevant project documents and design standards, public utility system maps, as-built plans, and details for use in the project design and submission of utility information request letters to privately-owned utility companies with facilities in the public right-of-way that may be affected as a result of this project.

Consultant will conduct a field review of the existing signal during the background research phase of the project and review any available as-built information. Consultant will walk the project area to document existing conditions, lane configurations, posted speed limits, signing and striping, curb ramps, parking, and visible utilities (above and below ground).

Consultant will conduct a topographic survey to obtain data necessary for the installation of standard ADA ramps. Survey control will tie into existing survey monuments and will provide right-of-way and easement information based on County records and tied to the City of San Leandro Horizontal and Vertical system.

Consultant will conduct the utility coordination task using contact information furnished by the City. Consultant will request and gather information from utility companies with facilities in the project area. These utilities will likely include PG&E, telephone, cable television, water, storm drain, and sanitary sewer facilities.

Prior to the development of the 70% PS&E documents, Consultant will develop the base plans for the project intersection. This includes developing the base maps and utility information based on information received from the City and utility companies, and the existing topographic survey of the intersection.

Once the Base Plan is complete, Consultant will begin the preparation of a technical memorandum. The technical memorandum will serve to document not only the design assumptions but will also include a 30% preliminary design and estimate of construction costs. The preliminary design will show all existing elements and the location of proposed improvements such as traffic signal infrastructure (poles, signal heads, pull boxes, conduits), curb ramps, and striping elements. The purpose of the memorandum is to inform and seek approval of the initial design elements prior to preparation of the 70% design plans.

Consultant will conduct an LED safety lighting photometric analysis of the intersection based on current standards and guidelines. The purpose of this analysis will be to determine the appropriate level of lighting at the intersections and identify ideal placement for LED luminaires at the intersection. Consultant will complete the analysis using AGI 32 software tool. Upon completion, Consultant will provide the City with the analysis results, and discuss lighting design implications.

Consultant will attend a design review meeting to discuss design direction and next steps.

Task 2.0 Deliverables:

- PDF of Preliminary Design Technical Memorandum
- Initial Photometric Analysis
- Preliminary Cost Estimate

Task 3.0 Design Development

Task 3.1 Develop 70% Plans, Specifications, and Estimate (PS&E)

Based on feedback from City staff on the Preliminary Design Technical Memorandum, Consultant will begin the preparation of the 70% design level plans, specifications, and opinions of probable cost (PS&E) for the project improvements. The plans will be prepared in AutoCAD format and submitted to the City in PDF at half scale. Consultant will utilize the City standard plan sheet borders with title block and general construction notes and CAD standards.

The anticipated breakdown of sheets for the 70% plans is as follows:

- Cover Sheet - General Notes, Project Location Map, Sheet Index, Benchmark, and Legend [1 sheet]
- Civil Improvements Plan [2 sheets]
- Utility Plan [1 sheet]
- Signal Modification Plan [1 sheet]
- Signing and Striping Plan [1 sheet]
- Lighting Plan [1 sheet]

- Detail Sheets [2 sheet]

The civil improvement plan and utility plan will be at a scale of 1"=10' and will show the new ADA curb ramps. Consultant will show the curb ramp improvements including conform points, sawcut limits, and flowline slopes. The new crosswalk across Wicks Boulevard requires the design of a new curb ramp.

The addition of this curb ramp will conflict with an existing fire hydrant and require relocation. The utility plan will be at a scale of 1"=10' and will show the fire hydrant relocation and details. Coordination will begin with EBMUD regarding the fire hydrant relocation. This coordination will include assisting the City in completing an application for relocation.

The signal plan will be drawn at a scale of 1"=20' and will include all signal poles and equipment, signal controllers and cabinets, service cabinets, conduit routing, pull boxes, and wiring. In addition, the signal plan will show the upgraded controller cabinet, service cabinet, and any modifications to PG&E service necessitated by the service cabinet upgrade.

Based on the layout of the signal equipment developed in the preliminary design, Kimley-Horn will perform potholing at up to ten (10) proposed pole locations at the project intersection to positively locate existing utilities and aid in the placement of the proposed signal poles locations. Prior to performing the potholing, the consultant shall provide associated traffic control plans (TCP) to the City for review and approval. In addition, consultant shall contact the Engineering and Transportation Department inspection group at ETinspection@sanleandro.org, or (510) 577-3308 every day that they will perform work that will interfere with traffic.

The signing and striping plan will be drawn at a scale of 1"=20' and will include all removal information for existing striping, pavement markings, signs, and sign posts, as well as, all installation information for proposed striping, pavement marking, signs, and sign posts. The signing and striping plan will also show the new crosswalk across Wicks Boulevard on the North leg of the project intersection.

The lighting plan will be drawn at a scale of 1"=20' and will include all removal information for existing lighting elements, as well as all installation information for proposed lighting elements.

For the 70% technical specifications submittal, Consultant will prepare the specifications based on the City boilerplate front end specifications. in Greenbook format. The specifications will be prepared in Microsoft Word and will reference the latest City and Caltrans Standard Specifications.

Construction cost estimate will be based on recent construction cost estimates received on signal projects. Construction cost estimates will be prepared in Microsoft Excel format.

Upon completion of the 70% plans, Kimley-Horn will begin coordination with PG&E on modifications regarding the new service cabinet. Since this intersection already has power, new power will not be needed but a service disconnect/reconnect will be required. At this stage, a service disconnect/reconnect application will be filed to PG&E.

Task 3.1 Deliverables:

- Half size 70% Plans in PDF format
- PDF of the 70% Technical Specifications and Construction Cost Estimate

Task 3.2 Prepare 100% Plans, Specifications, and Estimates

Upon completion of the 70% design review by the City, Consultant will organize a design review meeting to discuss comments on the design. A comment resolution matrix will be prepared summarizing comments received on the 70% PS&E documents, along with the resolution for each comment. This matrix will be submitted with the returned 100% PS&E documents original red-lined mark-ups of the 70% PS&E documents.

The additional design details to be prepared at the 100% design level include the following:

- Signal Equipment and Conductor Schedules [1 sheet]
- Detail Sheets [2 sheets]

The 100% technical specifications will be developed to include specific provisions regarding construction requirements, materials, and compensation.

At this stage, updated plans will be provided to PG&E to assist in the service disconnect/reconnect application efforts.

In addition coordination efforts will continue with EBMUD to get approval for the fire hydrant relocation.

Task 3.2 Deliverables:

- Half-size 100% plans in PDF format and six (6) 11"x17" hard copies
- PDF of the 100% Technical Specifications and Construction Cost Estimate
- Comment Resolution Matrix

Task 4.0 Final Design

Upon completion of the 100% design review by the City, Consultant will organize a design review meeting to receive and discuss comments on the design. A comment resolution matrix will be prepared which will summarize the comments received on the 100% PS&E documents and the resolutions for each comment. This matrix will be submitted with the returned Final PS&E documents original red-lined mark-ups of the 100% PS&E documents.

Based on the review comments on 100% PS&E, the approved version of the 100% PS&E will be advanced to the Final Design completion level.

Consultant will submit a pre-final PS&E to the City for a final plan check review. It is anticipated that any comments resulting from the plan check will be editorial in nature and will be communicated via email or discussed on a conference call. Any significant revisions to the design after submittal of the 100% PS&E will be considered as additional services to be completed for an additional fee upon receipt of written authorization from the City. A total of one additional design meeting is included after the submittal of the pre-final PS&E documents.

Consultant will also support the City with preparing the draft RFA package at this stage to obtain E-76 authorization for construction from Caltrans local assistance.

It is anticipated the City will furnish any applications and requirements to be used by the contractor to obtain permits for construction within city limits. Permit requirements will be included in an appendix to the technical specifications.

Final plans, specifications, and estimates will be prepared following completion of the City's plan check review. The final plans will be sealed by the professional engineer in responsible charge and will include the registration number and expiration date. The Final PS&E will be submitted to the City for use in advertising and constructing the improvements. Final plans will be provided electronically in PDF format and AutoCAD format on CD. Final specifications will be provided electronically in Microsoft Word format for the City's use in finalizing the bid documents for advertisement.

Final approval from PG&E is anticipated to be received during this task.
