SCOPE OF SERVICES

Contractor (Architect) will provide the following services for each individual commercial improvement project. Agreement will include multiple projects:

Project Specific Design Work

The architectural firms selected through this RFP will provide on-call design services to specific applicants as requested by City.

For each project, the Contractor will work directly with the property and business owner to design improvements which are consistent with the Downtown San Leandro Design Guidelines or other applicable guidelines, and are compatible with the particular area, building, and/or retail space, and within the project budget, according to the following procedure. The amount of time and funds to be spent on each project will be established by the project Contractor and the City staff after Meeting One.

If the amount of time and funds to be spent on each project is more than the annual not to exceed budget, the Contractor with City Staff shall review and reduce the scope of work and responsibility to be provided by the Contractor to be within the annual budget. Contractor shall submit an accurate estimate for completing conceptual design work, an initial timeline that will be revised as the project progresses, along with a list of proposed improvements. After review of the estimate, the City will issue a *Notice to Proceed with Conceptual Drawings* for the agreed upon scope and cost. Clients which exceed or are expected to exceed the agreed-to-amount for the project will be offered the opportunity to enter into a direct agreement with Kodama Diseno Architects to complete the project.

- a. Meeting One: The Contractor will attend a meeting with City staff and the applicant to discuss the scope of façade/tenant improvements and provide a rough estimate of costs for the project. At the meeting, the Contractor will work with the applicant to generate ideas and specific types of improvements that would improve the appearance of the building/commercial space and positively impact the commercial district. The architect will provide the City with an accurate estimate for the cost of design work.
- b. Research and Field Measuring: The Contractor will use historical and existing plans, as available for each project, to determine the potential for restoring the façade/historic interior and to inform the proposed design. Additional field measurements and photographs will also be made as required.
- c. Design Work: The architectural firm will then complete design proposal(s) for the project. Proposed façade improvements must be consistent with the budget for the project, as discussed at Meeting One. Two or more alternative designs may be required, depending on staff recommendations and the type of project. Depending on the scope of the project, additional meetings may be required to review preliminary design schemes with the applicant and City, prior to completing final drawings.

The design proposal must include construction-level, existing and proposed elevation(s), drawn to scale which will be used to illustrate the proposed improvements to the applicant and to contractors for bidding purposes. In certain cases, existing construction documents may be available; in other instances, as-built drawings will need to be completed for the applicable exterior elevations of the building. They should include measurements of all significant features to be installed, construction details, and specifications for materials and hardware, specific colors and finishes.

- d. Meeting Two/Three: City staff will arrange a second meeting with the applicant and the Contractor to review the drawings and specifications. Colors and finishes will be reviewed and agreed upon. A more precise figure for the estimated cost of the improvements will also be presented.
- e. Bidding Process: The Contractor will be responsible to review the bids received for their compliance with the specifications called for in the design documents and to ensure that no improper substitutions are made.
- f. Building Review: The Contractor will be responsible for taking the project through the City's Building Permit approval process.
- g. Construction Oversight: The Contractor will be responsible to assist City staff and the applicant with monitoring the construction process. Typically, this could include up to three (3) site visits, including a walk-through with the applicant and the Contractor to confirm project completion. Additional visits shall be requested by Contractor and authorized by Client.

Project Schedule

The average timeline for a minor façade improvement project is 4 to 6 months, from application through reimbursement. A major façade rehabilitation project averages 12 to 14 months. The average timeline for a tenant improvement project is 3 to 9 months. Timelines vary per individual project.

Grant-funded conversion of temporary to permanent outdoor seating projects need to achieve significant progress prior to the end of April, 2023.
